

# Lavar Ren

For veterinary use only  
100% herbal product

Improve kidney function  
Solution for oral administration

**The most important substances in this product include:** Phenolic compounds, Quercetin, Caffeoylmalic Acid and Chlorogenic acid

## Mechanism of action

Lavar Ren contains natural plant extracts such as Nettle extract. The various components of plant extracts will enhance the beneficial effects of each other.

People from different countries have long recognized the nettle as a valuable herb. Nettle is very effective in reducing inflammation and urinary tract infection and by increasing the volume and flow of urine; it prevents urinary retention in the urethra and results in the removal of urinary deposits from the kidneys.

It is also rich in iron and vitamin C and can act as an antioxidant and anti-stress agent.

## Indications

- Prevention and treatment of kidney and urinary tract infections
- Disinfection of the urethra
- Diuretic
- After treatment with antibiotics
- In cases of viral diseases (such as bronchitis and infectious bursal disease) and bacterial infections that cause inflammation and necrosis of the kidneys
