## شرکت دارویی زردبند

#### Zardband Pharmaceuticals

شرکت دارویی زردبند در سال ۱۳۷۲ به همت بزرگانی چون زنده یاد استاد دکتر رضا امیدبیگی و شادروان دکتر سید محمد فخر طباطبایی آغاز به کار کرد.

نقطه آغازین این فعالیت، کشت ارقام مختلف گیاهان دارویی درمزرعه تحقیقاتی این شرکت در روستای زردبند، واقع در شمال تهران، بود که دلیل نامگذاری آن هم شد.

توجه ویژه به الگوهای موجود در نظام طبیعت و بهره گیری از اصول کشاورزی پایدار، که از آغاز در فعالیت ما وجود داشته است، موجب گردیده که این شرکت امروز با کشت مساحتی بالغ بر چند صد هکتار از گونه های مختلف گیاهان دارویی در گستره این کشور پهناور، مطابق با استانداردهای GAP، به تولید داروهای گیاهی و فرآورده های مرتبط بپردازد.

اینک شرکت دارویی زردبند، با بهره گیری از تجربه و توان تخصصی خود در تمامی مراحل کاشت تا تولید انواع فرآورده های گیاهان دارویی مطابق با دانش روز، مفتخر است که از جمله تامین کنندگان عمده مواد اولیه گیاهی، داروهای گیاهی و فرآورده های گیاهان دارویی در بازار داخلی و بین المللی است.

عمده این محصولات شامل انواع عصاره ها و اسانس ها و افزودنی های صد در صد طبیعی برای استفاده در زمینه های مختلفی چون صنایع غذایی، دارویی، بهداشتی و آرایشی است. زردبند امروزه تلاش می کند در کنار عرضه محصولات خود به صنایع مختلف، با ارائه مجموعه

کامل داروهای گیاهی به بازار امکان دسترسی عموم مردم را نیز به این دستاوردها فراهم آورد.

In 1993 Zardband Pharmaceuticals started in a botanical garden in north of Tehran. In Zardband Pharmaceuticals we believe we've been lucky to work in a country like Iran; as we enjoy the benefit of a long history of herbal medicine, and having eleven of the world's fourteen climate zones, which provides us a great diversity of medicinal plants. Zardband is now holding a medicinal plants gene bank including 120 species of selected seeds, while cultivating more than 40 species of medicinal plants in hundreds of hectares of farms across the country.

Our agriculture research team is always on a mission, to find the proper climate for every precisely selected seed, or to find out what's best to harvest in any climatic zone. Besides all other necessities and researches provided, it results in a higher quality in active plant ingredient. Focusing on Iran's endemic plants, Zardband is mainly known for its agro-industrial identity and commitment to GAP regulations and agro-ecological farming systems.

Our products are now coming from our precisely managed farms all over Iran, divided in two main categories;

Raw material, and finished goods;

The raw material provided is actually herbal raw material used in different industries, mostly pharmaceutics, cosmetics, hygiene, food, and dietary supplements.

Our finished goods are produced in response to society needs and mainly categorized by their usages

The quality of our products in guaranteed by the whole procedure we start in our farms cultivating our precisely selected seeds, and we manage everything along the way to harvest and process the highest quality raw material.

شرکت دارویی زردبند به عنوان یک مجموعه کشت و صنعت و به پشتوانه تجربه و دانش خود در زمینه گیاهان دارویی می تواند انواع فرآورده های گیاهان داروییی را که به عنوان مواد اولیه در صنایع مختلف استفاده می شود، با بالاترین کیفیت، با ویژگیهای منحصر به فرد مطلوب مشتریان در اختیار آنان قرار دهد. نظارت دقیقی که بر تمامی مراحل کشت از انتخاب گونه مورد نظر و انتخاب بذر تا انتخاب اقلیم مناسب و شیوه کشت اعمال می شود نخستین دلیل کیفیت محصول به دست آمده است.

info@zardband.com

تحقیقات گسترده ما در طول این سال ها و توانایی و امکانات گسترده بخش تحقیق و توسعه شرکت زردبند موجب شده است تا بتوانیم مواد اولیه مورد نیاز صنایع مختلف را با مشخصات فنی مطلوب هر صنعت در اختیار مشتریان قرار دهد.

این ویژگیها، با تسهیل فرایندهای صنعتی، مزایای بسیاری برای مستریان ما در صنایع مختلف داشته، و موجب رغبت روزافزون آنان به استفاده از این مواد اولیه شده است.

An essential oil is a concentrated hydrophobic liquid containing volatile aromatic compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetherolea, or simply as the oil of the plant from which they were extracted. Generally, essential oils are extracted by steam distillation. They are used in perfumes, cosmetics and other products, for flavoring food and drink.

Product name	Origin	Marker(s)
Lavender اسطو خو دوس Essential Oil	Lavandula angustifolia Mill.	Linalol, Linalyl acetate
ا کالیپتوس Essential Oil	Eucalyptus spp.	1,8-Cineole, Limonene
Rosemary رزماری Essential Oil	Rosmarinus officinalis L.	1,8-Cineole, α-Pinene, Camphor
Garden Thyme آویشن باغی Essential Oil	Thymus vulgaris L.	Thymol, ρ-Cymene
Wild Thyme آویشن شیرازی Essential Oil	Zataria multiflora Bioss.	Carvacrol, Thymol
German Chamomile Essential Oil	Matricaria chamomilla L.	Chamazulene, Bisabolol oxides
Pennyroyal <sub>Essential Oil</sub>	Mentha pulegium L.	Pulegone
Spearmint اسپرمینت Essential Oil	Mentha spicata L.	Carvone, Limonene
Lemongrass علف ليمو Essential Oil	Cymbopogon citrartus L.	Citral (Neral+Geranial)
Damascus Rose گل محمدی Essential Oil	Rosa damascena Mill.	β-Citronellol, Geraniol
Peppermint نعناع فلفلي Essential Oil	Mentha × piperita L.	Menthol, Menthone, Menthofuran
Fennel درازیانه Essential Oil	Foeniculum vulgare Miller	Anethol, Fenchone

## **Fixed Oils**

### روغنهای خالص

Fixed oils are thick, viscous, yellow colored liquids with characteristic odor. They are non-volatile and cannot be distilled. Our fixed oils are extracted by cold press. A fixed oil is often employed as a carrier oil which does not evaporate. Also it is considered as natural non-volatile oil. Esters of long chain fatty acids & glycerin are called fixed oils. The major source of fixed oils are plant seeds.

Product name	Origin	Marker(s)
دانه کتان Flaxseed (Linseed)	Linum usitatissimum L.	α-Linolenic acid
Pumpkin Seed کدوی طبی	Cucurbita pepo var. Styriaca	β-Sitosterol, Linoleic acid, Oleic acid

## **Dry Extracts**

#### عصار ههای خشک

Dry extract is a solid powder preparation that can be incorporated into different solid dosage pharmaceuticals such as tablets, coated tablets and capsules and/or cosmetics or food additives. In production, the effective markers of the herb is most exhaustively extracted with an appropriate solvent. Thereafter, the solvent is evaporated again and the solid residue is fed to a drying process. Dried extracts have a moisture content of about 5%, however, they tend to attract moisture and thus clump together. Therefore, dry extracts often contain additives such as Maltodextrin and Silica..

Product name	Origin	Marker(s)
Milk Thistle ماریتیغال Dry Extract	Silybum marianum L.	Silymarin as silybin A & B
Saffron Dry Extract	Crocus Sativus L.	Crocin, Safranal
Purple coneflower سرخار گل <sub>Dry Extract</sub>	Echinacea purpurea L.	TPC as chlorogenic acid
تانسی <mark>Tansy</mark> <sub>Dry Extract</sub>	Tanacetum vulgare L.	TPC as galic acid
Goat's rue <sub>Dry Extract</sub>	Galega officinalis L.	Galegin
Nettle Dry Extract	Urtica dioica L.	Chlorogenic acid, TPC as galic acid
Dog rose رزا کانینا Dry Extract	Rosa canina L.	Vitamin C, TPC as galic acid
Melilot Dry Extract	Melilotus officinalis L.	Cumarin

## **Aqueous Extracts**

## عصارههای آبی

A liquid extract obtained by extracting the soluble components of the herb with water. It is suitable to use in hydrophilic formulations of pharmaceuticals and cosmetic industries as well as food industries

Product name	Origin	Marker(s)
Saffron مزعفران Aqueus Extract	Crocus Sativus L.	Safranal, Crocin , Picrocrocin

## Oily Extracts

#### عصارههای روغنی

An oily extract is a solution made by extracting (pulling or "washing") the herb's fat soluble phytochemicals (chemical constituents) into fatty oil as extraction solvent

solvent	enemical constituents) into fatty on as extracti

# Hydroglycolic Extracts عصارههای گلایکولی

Hydro-Glycolic extracts can be obtained either by extracting soluble components of herbs with proper mixture of water and alcohol, followed by evaporating alcohol content and replacing with propylene glycol, or by using propylene glycol at first as a solvent extract. It is also worth saying that Hydro-Glycolic extracts are suitable and promising in cosmetic applications, so they can successfully be employed instead of alcoholic ones.

Product name	Origin	Marker(s)
Lavender Hydroglycolic Extract	Lavandula angustifolia Mill.	Total phenol

## **Extractose**®

### اكستركتوز

Extractose is the brand name for a group of oils, soluble in water, under the terms of Zardband Pharmaceuticals patent. Extractose products are developed to be most suitable and promising in cosmetic applications, and they can be employed instead of alcholic extracts in a great way.
